

Graduate Research Assistant (m/f/d)

The Chair of Multimedia Communications and Signal Processing (LMS) is looking for a highly motivated and skilled graduate (M.Sc. or diploma in electrical engineering or information technology). The offered position is full time with a PhD aspired.

Tasks

The task comprises research in the highly topical scientific field of energy efficiency in video communications. The research will be conducted within an industry project. Furthermore, we expect the applicant to take part in teaching activities such as tutoring students and supervising theses. For a successful graduation to PhD, we expect the applicant to be highly committed and autonomous in his work.

Qualification

For a successful application, an outstanding graduation with a Master's or Diploma degree in the field of electrical engineering or information technology is required. Additionally, basic knowledge and experience in programming with languages such as C++, Java, Python, or Matlab is needed. Finally, the applicant shall be familiar with basic knowledge in signal processing and have a proficient level in the English language.

Further Information

The offered position is a full-time position. At our chair, you will have the opportunity to conduct highly topical research on an international level. Our chair has more than 25 years of experience in research on image and video processing and provides a dynamic environment with friendly and supportive colleagues. Please send your application by email until January 31st, 2022 to christian.herglotz@fau.de.
